Programme Objective:

It is essential to transform the educational landscape through innovative practices in teaching-learning for the 21st century classrooms. This research programme is deeply rooted in the scholarship of teaching and learning and its research revolves mainly around the niche areas of ICT as a pedagogical tool; teaching and learning strategies; teacher professional development; students' learning styles; preparation of in-service and pre-service teachers; and classroom (traditional and virtual) and programme assessment. The researchers are committed to finding ways of achieving better learning outcomes through innovative teaching and learning projects carried out in collaboration with individuals and groups from both the public and private sectors. The research findings will be beneficial to the country in terms of producing high quality human capital. Our programme is unique as it is supported by outstanding researchers from various disciplines who are not only constantly seeking ways to transform the educational landscape, but to ensure that these transformations can be sustained for the future generations.
