Programme Objective:

Entrepreneurship and leadership in education research inculcates learning and research culture for aspiring entrepreneurs' educators, educational administrators and leaders. In entrepreneurship education, innovations are expected in entrepreneurial leadership, entrepreneurial knowledge, entrepreneurial self-efficacy, entrepreneurial intentions among students, teaching strategies and learning styles, risk in entrepreneurship, and social entrepreneurship. Leadership in education unravel research issues and problems in educational leadership, governance, policy and planning, school and resource management, knowledge management, information management, quality management, higher education management, ethics in educational management, and personnel management. High impact findings will benefit educators, administrators and leaders with theoretical and practical knowledge and innovations in niche areas that allow them to contribute significantly to the improvement and excellence of education as well as to nation building.

Keywords: Entrepreneurship education, leadership, educational administration
