

## **Introduction**

Teaching practicum and internship provide important training opportunities for teacher trainees to gain teaching experience and/or undergo counseling internship in activities related to teacher training.

The teaching practicum is carried out in secondary schools. In the school environment, trainee counselors will also have the opportunity to develop their skills in giving counseling services.

## **Implementation**

The duration of teaching practicum and internship for trainees who have to undergo teacher training for their major and minor fields is twelve weeks, while trainees for guidance and counseling will have to undergo 14 weeks of teaching practicum and internship. Any changes in the duration of teaching practicum and internship will be informed by the Teaching Practicum and Internship Committee. Teacher trainees who are not able to complete their teaching practicum during the scheduled time will have to undergo the teaching practicum the following year.
